Maybe if this project is at a standstill!

We can provide a step by step guide to build your own Libre-Slackware64-15.0

Maybe using the scripts from building of Freeslack-14.2

Everything we have running and in useful form is published and permissively licensed, including the little work I've done for 15.0. You can use all/any of our documentation or code, as long as you abide by the terms of the corresponding licenses.

PS: git view: <https://git.albertleadata.org/melikamp/fxp>
